

**PRICE LIST OF SERVICES OFFERED BY
ELEKTRODISTRIBUTION NORTH AD**
in force from 28.03.2025 r.

ACTIVITIES RELATED TO ELECTRICITY MEASUREMENT	Price in BGN (incl. VAT)	Price in EUR (incl. VAT)	Term (in days)
Unlocking of an electricity board upon customer request	23,81	12,17	7
Change of measurement tariffs of electricity upon customer request	23,00	11,76	14
Change of measurement tariffs of electricity (if technically possible, without changing the electricity meter)*	5,00	2,56	7
Temporary termination of electricity supply of a site upon customer request			
from an electricity meter	19,00	9,71	20
from a pole	23,00	11,76	20
from a distribution unit	30,00	15,34	20
Disconnection of the electric power transfer upon request from the supplier of last resort / public supplier / final supplier / trader of electric power			
from an electricity meter	19,00	9,71	After evaluation of the possibilities for disconnection
from a pole	23,00	11,76	
from a distribution unit	30,00	15,34	
Restoration of the electric power transfer upon request from the supplier of last resort / public supplier / trader of electric power			
from an electricity meter	19,00	9,71	Until 12:00 o'clock on the work day that follows the day the payment is due
from a pole	23,00	11,76	
from a distribution unit	30,00	15,34	7
Express restoration of the electric power transfer upon request from the supplier of last resort / public supplier / trader of electric power			
from an electricity meter	38,00	19,43	On the day of submitting the service request, but no later than 4:30 p.m.
from a pole	46,00	23,52	
from a distribution unit	60,00	30,68	
Restoration of the transfer and access to the electric distribution grid of a disconnected customer due to non-payment to the operator of the electricity distribution grid			
from an electricity meter	19,00	9,71	Until 12:00 o'clock on the work day that follows the day the payment is due
from a pole	23,00	11,76	
from a distribution unit	30,00	15,34	7
Express restoration of the transfer and access to the electric distribution grid of a disconnected customer due to non-payment to the operator of the electricity distribution grid			
from an electricity meter	38,00	19,43	On the day of the payment of the amounts due (only in case of payment is before 6.00 p.m.)
from a pole	46,00	23,52	
from a distribution unit	60,00	30,68	
Change of the side of measurement from LV to MV upon customer's request from a customer			
preliminary research and giving a statement	187,69	95,96	20
installation of MV current transformers and setting up of a secondary commutation - per 1 No.	138,77	70,95	14
Connection of temporary movable object			
single phase power supply	96,18	49,18	20
three phase power supply	108,35	55,40	20
Reduction of the provided power to a customer	free of charge	free of charge	30 /the implementation period of 30 days does not include the period from the notification of the client for the prepared opinion to the day of written confirmation by the client/
Service in compliance with art. 120, para. 5 of the EA			

Replacement of an electricity meter at the site of a customer with one with remote reporting of metering data by settlement periods in accordance with the rules under Art. 91, para. 2 of the EA	327,37	167,38	30
Reparameterization of the metering device at the site of a customer with the purpose of transferring data from the measurement by periods of settlement in compliance with the rules according to art. 91, par. 2 from the EA	100,84	51,56	30
Providing of a permanent distance access from the measurement for an interval no longer than 15 minutes in the respective period for settlement according to art. 120, par. 9 from the EA	free of charge	free of charge	30
Installation of an additional section for auxiliary devices	84,01	42,95	14
A shift of exported on the boundary of property by distribution board of a site on request of customer**	111,37	56,94	14
Installation of a controlling electricity meter, owned by the customer ***			
single phase electricity meter	30,00	15,34	30
three phase electricity meter	30,00	15,34	30
Installation and deinstallation of a registering electricity device for quality parameters and observation of LV or MV	38,00	19,43	10
Technical inspection and acceptance of a generator for an autonomous supply	139,72	71,44	30
Technical inspection and issuing a statement for putting an energy site into operation (MV and LV)	159,46	81,53	14
Inspection of electric meters (single or three phase) at a site with a pattern device upon customer request and preparation of a protocol of findings	30,00	15,34	7
Dismantling of electric meters (single or three phase) upon customer request for inspection in a specialized lab	30,00	15,34	7
Controlling (additional) meter reading upon customer request	42,58	21,77	7
Certificate verifying availability / absence of contract relations between a customer and Electrodistribution North AD	4,46	2,28	1
Issuing of a certificate for availability / absence of customer's liabilities towards Electrodistribution North AD	20,38	10,42	1
Inquiry for current and overdue payments	7,33	3,75	1
Issuing of invoice copy upon customer's request	3,94	2,01	7
Resending documents for invoice corrections	4,82	2,46	7
Temporary termination of access to the electric distribution grid	free of charge	free of charge	14
Disconnection of the electric power transfer of customer site on free market upon request from previous energy supplier	29,05	14,85	21
Reconnection of the electric power supply of customer site on free market upon request from previous energy supplier	26,04	13,31	2
Express reconnection of the electric power supply of a customer on a free market upon request from previous energy supplier	52,08	26,63	On the day of submitting the service request, but no later than 4:30 p.m.
Daily data of used / generated electric active power of a remotely read meter with power capacity up to 100 kW. The inquiry is for 1 month period	23,03	11,78	7
Issuing of an inquiry for site consumption for the last 12/ 24/ 36 months	14,81	7,57	7
Reference report on consumption for a group of sites in a building (entrance) for 36 months period. It should be received by an account holder or a condominium representative	218,81	111,88	7
Inquiry for electricity consumption and production for 36 months period. It should be received by a legal representative	341,78	174,75	14
Providing settlement period data for used and / or generated electric active and reactive power of a remotely read meter for customer's site with power capacity of 100 kW or more and for generator's site with power capacity over 30 kW	31,67	16,19	7
Providing hourly data report on used and / or generated electric active power of a remotely read customer's / generator's meter with a registered hourly profile on free market - for a previous period	29,20	14,93	7
Inspection of customers' indirect measurement system using measurement standard and issuing protocol	111,36	56,94	21
Secondary circuit access given to customers' indirect measurement system	272,06	139,10	21
Installation of a measuring device for a monitoring system in the licensed territory of Electrodistribution North AD, owned by an applicant			
with direct measurement of electricity	166,14	84,95	30
with indirect measurement of electricity	194,42	99,41	30
RESEARCH ACTIVITIES FOR EXTERNAL POWER SUPPLY	Price in BGN (incl. VAT)	Price in EUR (incl. VAT)	Term (in days)

Performing a preliminary research about external electric power supply with the aim to change the land purpose, etc.	172,62	88,26	14
Performing a research about external electrical power supply, provision of technical instructions and issuance of a capacity certificate			
• less than 6 kW	66,84	34,17	According to Ordinance No. 6 of 28.03.2024 on the connection of facilities to the electricity grids
• from 7 kW up to 15 kW	73,44	37,55	According to Ordinance No. 6 of 28.03.2024 on the connection of facilities to the electricity grids
• from 16 kW up to 50 kW	89,94	45,99	According to Ordinance No. 6 of 28.03.2024 on the connection of facilities to the electricity grids
• from 51 kW up to 100 kW	123,00	62,89	According to Ordinance No. 6 of 28.03.2024 on the connection of facilities to the electricity grids
• from 101 kW up to 200 kW	222,24	113,63	According to Ordinance No. 6 of 28.03.2024 on the connection of facilities to the electricity grids
• from 201 kW up to 400 kW	255,64	130,71	According to Ordinance No. 6 of 28.03.2024 on the connection of facilities to the electricity grids
• over 400 kW	668,64	341,87	According to Ordinance No. 6 of 28.03.2024 on the connection of facilities to the electricity grids
Participation in acceptance and coordinating commissions and issuing a written statement that an energy site is ready to start operating	139,86	71,51	14
Providing technical consultation to designers, instructions on designing and coordination designs and coordination of working designs about <u>connection equipment, part electricity supply</u>	56,88	29,08	10 working days
Reconciliation of technical project of generator	56,88	29,08	14
Mapping of underground communications on a scheme, format A4/A3 in scale of 1:500/1:1000	60,54	30,95	20
Mapping of underground communications on a scheme, format A2/A1 in scale of 1:500/1:1000	64,92	33,19	20
Mapping of underground communications on a scheme, format A0/nonstandard, in scale of 1:500/1:1000	161,40	82,52	20
Coordination of land use plans and infrastructure projects	56,88	29,08	30
Research on request for moving existing energy sites	159,22	81,41	30
OPERATIONS ON MV GRID	Price in BGN (incl. VAT)	Price in EUR (incl. VAT)	Term (in days)
Securing safe conditions at the work place and allowing access to work	122,30	62,53	20
Operative switch overs in preparation for work upon customer request	122,30	62,53	20
Connection (disconnection) of diversion EL/CL 20 kV	97,36	49,78	20
OPERATIONS ON LV GRID	Price in BGN (incl. VAT)	Price in EUR (incl. VAT)	Term (in days)
Securing safe conditions at the work place and allowing access to work	79,86	40,83	20
Connection (disconnection) of overhead / arial recommended diversion length up to 40 m	92,33	47,21	20
TRANSFORMERS AND NODE STATIONS	Price in BGN (incl. VAT)	Price in EUR (incl. VAT)	Term (in days)
Securing safe conditions at the work place and allowing access to work	79,86	40,83	5
Inspection of the equipment in a TS and preparation of technical statement	79,86	40,83	5
Replacement of a high voltage fuse	54,91	28,08	1
Subletting a transformer under rent - the price of the service is per 1 (one) day (offers after signing a rental agreement)	24,94	12,75	20
LABORATORY SERVICES	Price in BGN (incl. VAT)	Price in EUR (incl. VAT)	Term (in days)
Determination of the route of a cable line	104,80	53,58	5
Specifying a cable in a sheath of cables	79,86	40,83	5

Notes:

* Effective as of next meter reading period

** Depending on the technical solution for the implementation of the service it is possible several items from the Price list to be calculated.

*** The electricity meter, panel and all other materials are provided by the customer and are his property according to the Rules for Measuring the Quantity of Electrical Energy
